This information is provided for purchasers of Tobacco Acid Phosphatase represented by the following Epicentre catalog numbers:

T19100 T19050 T19250 T19500

The product is derived from tobacco. This protein presents no known threat to humans or laboratory animals. The storage solution is a 50/50 glycerol/H₂O solution containing salts and a detergent. The salts and detergent(s) are present at less than 1% concentrations and represent no known hazards. A material safety data sheet for glycerol is provided.

The 10X reaction buffer is not known to be hazardous and contains salts, EDTA and 1% 2-mercaptoethanol which are believed to be harmless at the concentrations provided.

This information is believed to be correct, however, Epicentre makes no guarantee of the accuracy or completeness of the data and shall not be liable for any damages. This document is offered solely as a guide for the customer's consideration, investigation and verification. These suggestions do not replace state, municipal and/or insurance requirements. Any use of this information must be determined by the user to be in accordance with applicable federal, state and local regulations.
