This information is provided for purchasers of the Fast-Link™ DNA Ligation and Screening Kits LK08050, LK08100, LK63050, LK63100 and Fast-Link™ DNA Ligation Kits LK6201H, LK0750H and LK11025 and Colony Fast-Screen™ Kit FS08250.

These kits contain several reagent tubes.

The Fast-Link™ DNA Ligase is a protein isolated from non-hazardous bacteria. This protein presents no known threat to humans or laboratory animals. Each of these protein solutions is supplied in a 50/50 glycerol:H₂O solution containing salts and a detergent. A material safety data sheet for glycerol is available. These materials are for research use only.

Kits LK08050, LK08100, LK63050, LK63100 and FS08250 contain a lysis buffers with SDS. An MSDS is available for SDS.

Kits LK08050 and LK08100 contain EpiBlue™ Buffer which is a aqueous solution containing a low concentration of a dye and is not thought to be hazardous.

The remaining tubes in the kits contain dilute aqueous solutions of detergents, dyes, salts and/or nucleic acids, none of which are thought to be hazardous and hence do not require separate MSDSs.
