The EpiFOS™ Fosmid Library Production Kit (catalog number FOS0901) consists of several tubes containing, enzymes, a nonhazardous *E.coli* strain, control DNA, packaging extracts, aqueous buffers and solutions, salts, enzymes, nucleotide triphosphates, glycerol and detergents. The enzymes are supplied as 50% glycerol solutions. In addition 5 M ammonium acetate is provided. An MSDS is available for ammonium acetate (#13).

The pEpiFOS™-5 Forward (F5FP010) and Reverse (F5RP011) Primers are not believed to be hazardous and do not require an MSDS.

An MSDS for glycerol is available upon request. No known hazards are associated with the materials in these products at the concentrations provided.

Epicentre recommends all normal precautions be taken whenever all hazards are not known. We recommend wearing gloves and avoiding direct contact with skin and eyes when handling chemical solutions.
