This information is provided for the purchasers of the products described by the following EPICENTRE catalog numbers:

FSR0360 FSR03200 FSPR03A ⇒ FSPR03L

The FailSafe™ Real-Time PCR PreMix Selection Kit and the FailSafe™ Real-Time PCR System contain enzymes isolated from nonhazardous bacteria. These proteins present no known threat to humans or laboratory animals. These protein mixes are supplied as 50/50 glycerol: H₂O solutions containing salts and a detergent. A material safety data sheet for glycerol is attached.

The remaining tubes in the FailSafe™ Real-Time PCR PreMix Selection Kit, the FailSafe™ Real-Time System and the separate FailSafe™ Real-Time PCR 2X PreMixes contain aqueous solutions of salts, nucleotides, SYBR® Green dye and a detergent none of which are thought to be hazardous at the concentrations provided and hence do not require separate MSDSs.

The ROX internal reference dye is 5-carboxy-x-rhodamine supplied in dimethylformamide. ROX supplied at the concentration provided does not require an MSDS. Toxicological information concerning this dye are largely unknown. An MSDS for dimethylformamide is available.
